Background

Who is Dr Abbie Clinics?

Dr Abbie Clinics is a Sydney based medical practitioner that has been at the forefront of providing bio-mechanical assessment services to Australians for over three decades now. Over the years, Dr Abbie Clinics has taken pride in providing the a high quality and customised service to the people of Australia.

For Dr Abbie Clinics to be able to take their service to the next level, a sound and robust IT network was key to achieving that. This was when Sprint Networks stepped in and helped transform the network digitally.

What were the existing IT issues?

Lack of Business Continuity

Lack of Cyber-security

Poor Wi-Fi connectivity

No secure data backup

No Visibility of the network

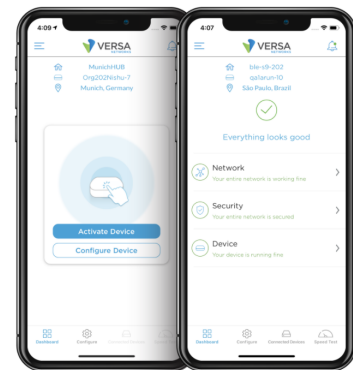

Poorly managed network

Our Solution

All-in-one Device- The new '**Heart**' of the Network

What the solution did for Dr Abbie Clinics:

Provides business continuity when the NBN goes down

Built-in NGFW protects patients confidential information from cyber threats

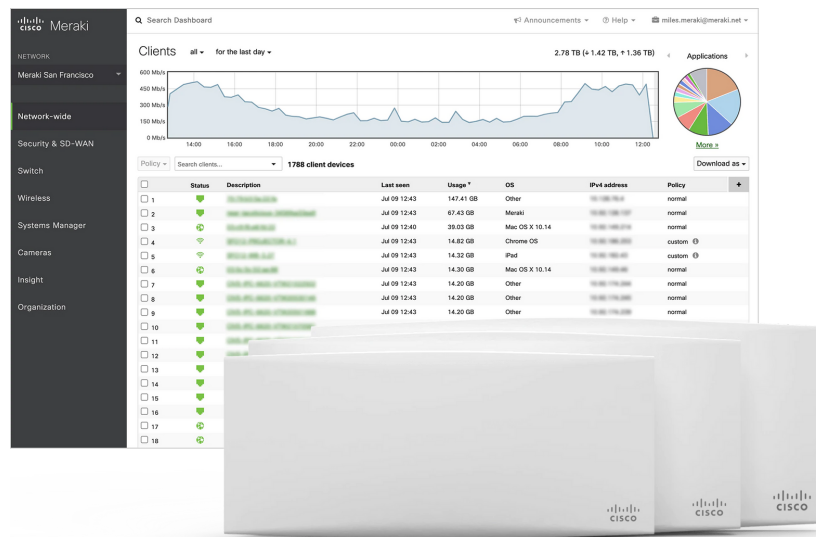

Complete network visibility and monitoring of all network traffic.

The entire network accessible from the palm of a mobile phone.

Our Solution

Wi-Fi 6- No more connectivity woes!

Our state-of-the-art Wi-Fi 6 solution aims at providing secure and fast internet access to all users at the clinic. This will be done using a Cisco Meraki solution, that is a market leader in the field of high-efficiency wireless.

What the solution did for Dr Abbie Clinics:

Fast and secure Wi-Fi for all users at the clinic

Optimum Wi-Fi coverage across the clinic

High capacity Wi-Fi 6, ensuring more stable connections.

The Future

Meraki Cameras

Remote Access

Our future proposals to Dr Abbie would include cloud managed cameras and also a remote work from anywhere solution. These solutions are intended to provide Dr Abbie Clinics with a digitally transformed network that will help drive the business to serve its customers better, day-in and day-out.

“

We are delighted to have a cyber-security system in place for our Medical practice.

We had a lot of concerns with our NBN and IT Security. All our Medical systems are on the Internet. If we lose access to our NBN or the data is compromised, our business is hampered and we lose our patient's trust.

We were in dire need of a reliable solution that would secure our customer data, business systems and provide a backup option for the NBN.

We appreciate Sprint Networks for delivering a complete cyber-security and NBN backup solution for us.
